## V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. STATEMENT

Novelty (N)	Claims <u>1-14</u>	YES
	Claims <u>None</u>	NO
Inventive Step (IS)	Claims <u>1-14</u>	YES
	Claims <u>None</u>	NO
Industrial Applicability (IA)	Claims <u>1-14</u>	YES
	Claims <u>NONE</u>	NO

### 2. CITATIONS AND EXPLANATIONS

Claims 1-14 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the claimed mobile cellular terminal comprising, among other things, a card access module and router, a modulator/demodulator, an RF antenna, and a card reader chip in which the card access module and router is coupled to the smart card application host via the card reader chip and is coupled to the terminal interface and is also coupled to the RF antenna via the modulator/demodulator, the RF antenna in turn being radioactively coupled to the contactless smart card reader. Accordingly, one of ordinary skill in the art would not have been motivated to modify teachings of prior art to meet the claimed limitations as set forth in the present claimed invention.

Claims 1-14 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
